

COMP 003 COMPUTER PROGRAMMING 2

Activity 6: C Structures - Student Records

Instructions: Submit your code in pdf format on Google Classroom.

You have been assigned the task of designing a student database system. To accomplish this, define a structure named "Student" with the following members:

- Name (string)
- Student number (integer)
- Age (integer)
- Grade (double) (0-100)

Write a program that creates an array of 5 Student structures and allows the user to enter the details for each student. Then, display the information of all the students. Additionally, include the following functionalities in your program:

1. Find the oldest student among the entered details and display their information.
2. Calculate and display the average grade of all the students.

Sample Input:

Enter the details of 5 students:

Student 1:

Name: John dela Cruz

Student Number: 001

Age: 25

Grade: 89

Student 2:

Name: Grace Yap

Student Number: 002

Age: 26

Grade: 87

Student 3:

Name: David Son

Student Number: 003

Age: 28

Grade: 97

Student 4:

Name: Teresa Marquez

Student Number: 004

Age: 26

Grade: 91

Student 5:

Name: Apple Tan

Student Number: 005

Age: 30

Grade: 93

Sample Output:

Information of all students:

Student 1:

Name: John dela Cruz

Student Number: 001

Age: 25

Grade: 89

Student 2:

Name: Grace Yap

Student Number: 002

Age: 26

Grade: 87

Student 3:

Name: David Son

Student Number: 003

Age: 28

Grade: 97

Student 4:

Name: Teresa Marquez

Student Number: 004

Age: 26

Grade: 91

Student 5:

Name: Apple Tan

Student Number: 005

Age: 30

Republic of the Philippines
POLYTECHNIC UNIVERSITY OF THE PHILIPPINES
College of Computer and Information Sciences
Sta. Mesa, Manila

Grade: 93

The oldest student is:

Name: Apple Tan

Student Number: 5

Age: 30

Grade: 93.00

The average grade of all students is: 91.40
