

COMP 003 COMPUTER PROGRAMMING 2

Activity 9 - Expense Tracker

Create a C program that uses structures, arrays of structures, functions, and structure pointers to implement a simple Expense Tracker System.

Program Requirements:

1. Create a structure named Expense containing:
 - o Date
 - o Category
 - o Amount
2. Ask the user how many expenses will be entered.
3. Use an array of structures to store all expense records.
4. Create functions for the following:
 - a. Add expenses
 - b. Display all expenses
 - c. Compute total expenses
 - d. Compute total expenses per category
 - e. Filter expenses by category OR by date
 - f. Update an expense amount by selecting an expense record to update.

Submission Requirements:

1. Source code (.txt file)
2. Screenshot of sample output (pdf)
3. Short 3–5 minute screen-recorded video explaining their program. The video must include:
 - State your name (Example: This is Richard Cruz)
 - Brief explanation of the structure used
 - Explanation of each function and codes
 - Demonstration of program execution
