COMP 003 COMPUTER PROGRAMMING 2

Review Activity (Structures II)

Instructions: Solve the following using C Programming. You may use a word processing tool for your answers. Save and compile your activity in txt (Code) and pdf (Input/Output) format and submit on Google Classroom.

Create a payroll management program in C using structures and arrays.

Requirements:

1. Create a structure named Employee containing:
 - Employee ID
 - Name
 - Department
 - Salary
2. Ask the user how many employees will be stored.
3. Use an array of structures to store employee records.
4. Create the following functions:
 - inputEmployee() → Input employee details
 - displayEmployees() → Display all employee records
 - updateSalary() → Update the salary of a specific employee using Employee ID

Sample Input/Output

Enter number of employees: 3

=== Employee 1 ===

Enter Employee ID: 101

Enter Name: John Doe

Enter Department: IT

Enter Salary: 25000

=== Employee 2 ===

Enter Employee ID: 102

Enter Name: Maria Santos
Enter Department: HR
Enter Salary: 30000

=== Employee 3 ===

Enter Employee ID: 103
Enter Name: James Cruz
Enter Department: Finance
Enter Salary: 28000
